CAREER OBJECTIVE

Detail-oriented Computer Science Engineering graduate with 1 year of experience in technical operations and infrastructure management. Proven track record in managing server lifecycles, automating workflows, and troubleshooting complex technical issues. Seeking to leverage my analytical skills and passion for technology to contribute to a dynamic team and drive operational excellence.

EXPERIENCE

DigiRDP - Linux Technical Associate Apr 2025 – Present

- Proactively managed and troubleshoot **Bare Metal Dedicated Servers**, ensuring high uptime for enterprise-grade hardware.
- Deployed and maintained **Linux VPS** and **Windows RDP** environments using **Virtualizor** and **Tenant OS** management.
- Automated hosting operations and account provisioning via **cPanel** and **WHMCS** to improve service delivery.

EDUCATION

Asansol Engineering College. B.Tech in Computer Science and Engineering Aug 2021 – Jun 2024

- GPA: 8.1/10.0

Asansol Institute Of Engineering And Management. Dipolma in Computer Science and Technology Jun 2018 – May 2021

- Per: 73.6%

D.A.V Public School, Asansol [CBSE]. Class X June 2018

- Per: 58.6%

PROJECTS

Enhanced Research Assistant (PYTHON AND LLM) February 2024

- Tools & technologies used: Python, Langchain, Streamlit, HuggingFace, OpenAI.
- LLM-powered research assistant tool tackles PDFs, CSVs, and websites. It helps researchers gather info, analyze data, and gain insights efficiently.

Smart Attendance System (PYTHON AND DBMS) January 2021

- This project automates attendance with a Python-based, machine learning-powered system, using face detection for accurate identification. It simplifies record-keeping and enhances efficiency by replacing manual attendance processes with intelligent facial recognition.

TECHNICAL SKILLS AND INTERESTS

Languages: English, Hindi, Bengali.

Skills: Java, JavaScript, CSS, HTML, Python, Bash Scripting, Linux (Ubuntu/CentOS), Windows Server.

Data & Operations: Advanced Excel, Data Analysis, Product Lifecycle Management.

Frameworks & Tools: Streamlit, OpenAI API, ReactJS, SpringBoot

Server Administration: Virtualizor, WHMCS, cPanel/WHM, RDP/SSH, Bare Metal Provisioning, Docker.

Developer Tools: Visual Studio Code, Git, Figma, Putty/WinSCP, Postman.

Hobbies: Cricket, Photography, Traveling, Swimming, PC/Console Gaming, Custom PC Building.

INTERNSHIP

Java Full Stack Development- Zidio Development

- This project developed an enterprise expense management system, streamlining financial tracking and reporting. Built with React.js for the front-end, Spring Boot for the backend, and MySQL for data storage, it offers a robust and scalable solution for managing company expenses.
